Excerpt from Bulletin of the New York Mathematical Society, 1894, Vol. 3 At the same time the attention bestowed upon it by the general scientific public diminished in equal proportion. It became almost the custom to regard modern mathematical speculation as something having no general interest or importance; and the proposal was even made that, at least for purposes of instruction, all results be formulated from the same standpoint as in the earlier period. Such conditions were unquestionably to be regretted. This is a picture of the past. I wish on the present occasion to state and to emphasize the fact that in the last two decades a marked improvement from within has asserted itself in our Science, with constantly increasing success. The matter has been found simpler than was at first believed. It appears, indeed, that the different branches of mathematics have actually developed not in diverging but in parallel directions; that it is possible to combine their results into certain general conceptions. Such a conception is that of the function - in particular that of the...
