Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Lectures on Cement General meaning of the term and its limitation in the present discourse. The principal structural cements will be dealt with, and minor adhesives of the workshop will be touched on only incidentally and illustratively, if at all. In practice this delimits the term to calcareous cements. Historical account of the evolution of cements in this limited sense. Cement making is a branch of chemical manufacture. Chemical reactions and physical changes involved in the production of cements and in their setting and decay. Modes of testing, both chemical and physical, the latter including mechanical tests as ordinarily understood. Standardisation of all tests which from their nature are arbitrary, and the device and acceptance of standard specifications. The British Standard Specification as an example. The uses of cements and the errors which may occur from unintelligent application. The causes of failure of structures made with cement. The importance of the aggregate used with cement to make mortar and concrete, and the errors which arise from want of knowledge of its properties. The necessary equipment of knowledge and training for an expert. Physical and mechanical knowledge an essential, in addition to ordinary chemical training. The ignorance now existing of the constitution of cement as produced and when set; the admirable but insufficient work of the past and the consequent opportunities for rigorous research in a subject of exceptional difficulty. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in...
